TRAINING DEPARTMENT

Prevost training: real added value for your company

Prevost offers training on the subject of compressed air: **PRODUCTION / PROCESSING / DISTRIBUTION / USE**

Why?

Prevost provides training for your staff on the subject of compressed air, at the appropriate level and in line with your expectations.

The aim of this training is to provide you with the necessary knowledge of compressed air production and use, and of product specifications and performance, so as to be able to offer your customers useful and reasoned advice.

Who?

Our training courses are aimed at any of our partners seeking to incorporate **proficiency in compressed air** into their strategies:

- Design office technicians
- Sales engineers
- Sales and telesales representatives, product staff
- Maintenance technicians
- Installers

When?

We offer intensive training courses, **without disrupting your company's organisation.** Our courses are scheduled to suit your availability and our instructors' timetables.

Contact our training department to book a date:

training@prevost.eu

Training programmes

- The basics of compressed air
- Couplings and connectors
- The workstation and safety
- Air filtration
- Air drying
- Design of distribution networks
- Processing and energy savings
