

APPLICATIONS

In our view, one of the best assurances of quality is our thorough knowledge of your applications.

Prevost operates in the main industrial and service sectors in which pneumatic and hydraulic power are used:

- **Automotive industry:** Automotive construction, assembly lines, etc.
- **Automotive maintenance:** Mechanical repairs, paintwork, bodywork, etc.
- **Plastics processing**
- **Wood industry:** Sawmills, joinery workshops, etc.
- **Textile industry:** Weaving mills, garment manufacturing plants, etc.
- **Food-processing industry:** Slaughterhouses, meat processing plants, dairies, etc.

Our products comply with a wide range of quality standards, hygiene requirements, and sustainability and performance criteria. They are specifically designed to meet the needs of this wide range of applications.

SERVICES

Prevost is committed to providing the highest levels of quality and reliability, in optimum conditions, for both products and services.

Network design

Prevost places its expertise at your disposal via an in-house service comprising analysis of your needs and providing advice and quotations:

- overall network diagrams
- detailed diagrams
- full quotations

Product training

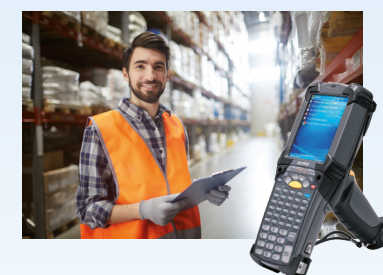

Prevost offers a wide range of training programmes focused on compressed air. These programmes are aimed at professionals looking to incorporate energy efficiency in their production and marketing strategies. A range of training courses can be provided on our premises or at your sites.

A sales department that is available and responsive

Efficient logistics

A company that heeds market developments and listens to customer expectations

CONNECTED TO INNOVATION

YOUR PARTNER FOR MORE THAN 40 YEARS

For more than 40 years, Prevost has been designing, manufacturing and marketing a comprehensive range of products for compressed air and fluid distribution networks, including safety couplings, filtering solutions and pneumatic equipment.

Every day, our staff work to expand the horizon for our customers:

- through innovation and constantly seeking areas for improvement,
- through the quality of our products, advice and services.
