

Filtration and regulation unit for paint booths

MICRON FILTRATION (MFM)

- Removes more than 99.99% of solid and liquid particles larger than 1µm
- Eliminates more than 80% of oils

ACTIVATED CARBON FILTRATION (MFC)

- Removes more than 99.99% of solid and liquid particles larger than 0.1µm
- Eliminates more than 99% of oils
- Cartridges developed for optimal and regular air flow
- Low pressure loss

SUB-MICRON FILTRATION (MFB)

- Removes more than 99.99% of solid and liquid particles larger than 0.1µm
- Eliminates more than 99% of oils

ALTO 3 SERIES

- Pre-filter of 5 µm. Regulator 0-10 bar
- Micron filter of 0.01µm
- Removes contaminants
- Extends the life of paint spray guns
- Pressure gauge with solvent-resistant dial

Paint booth essentials

prevoS1 SAFETY FITTINGS

- **One-push** = decompression + disconnection
- **Anti-scratch**, protects fragile surfaces
- **Anti-static**, prevents build-up of static electricity
- **Optimized flow** for maximum productivity of your pneumatic tools

- 360° swivel fittings for freedom of movement

- 360° swivel fittings for freedom of movement

prevoS1 BLOW GUNS

- **Easy to use**
- **Built-in adaptor**
- **Highly maneuverable** when combined with the **prevoS1** quick coupling.

STOFLEX ANTI-STATIC HOSES

- **Anti-static**, silicone-free
- **Anti-scratch**, rubber material
- Tolerance up to 70°C
- Very good flexibility

PAINT SPRAY GUNS

- **Ergonomic handling**
- Optimal paint application:
Standard paints
HLVP paints
Water-soluble base paints
